

August 2014

The link you followed to get here pointed to a version of a paper, "*Converting US Topo GeoPDF Layers to GeoTIFF*," that is out of date and has been removed from the USGS web space. To access the current version of this paper, follow the link contained in this USGS FAQ:

<http://www.usgs.gov/faq/categories/9797/3704>

If you are reading this long after 2014, or if the FAQ no longer exists or does not contain a link to a paper about GeoPDF to GeoTIFF conversion, it may mean that the subject of US Topo to GeoTIFF is no longer relevant.
